

ABS LABOUR FORCE SURVEY
MAY 1979

HUR920

0001

[illegible][illegible][illegible]

Figure 1 shows two side-by-side photographs of a 1000 mg tablet. The left photograph shows the tablet with clear markings: '1000' and 'NORVISO'. The right photograph shows the same tablet after a 10-minute water immersion, where the markings are significantly blurred and less legible.

Figure 1 consists of two side-by-side histograms. The left histogram is titled 'S.S. - 10000' and the right is titled 'S.S. - 100000'. Both histograms show the distribution of the number of non-zero elements in the sparse matrices. The x-axis for both is 'Number of non-zero elements' and the y-axis is 'Frequency'. The left histogram has a peak around 1000 non-zero elements, while the right histogram has a peak around 10,000 non-zero elements. The right histogram also shows a long tail extending up to 100,000 non-zero elements.

Figure 1 consists of two side-by-side histograms. The left histogram is titled 'A (10000x10000)' and the right is titled 'B (10000x10000)'. Both histograms show the distribution of the number of non-zero elements in the sparse matrices. The x-axis represents the number of non-zero elements per row, ranging from 0 to 10000. The y-axis represents the frequency of rows with a given number of non-zero elements. Both distributions are roughly bell-shaped, peaking around 1000 non-zero elements per row.

Figure 1 shows two side-by-side grayscale images of a 10x10 grid of handwritten digits. The left image is labeled 'NIST database' and the right image is labeled 'NIST database'.

[illegible][illegible]

Figure 1 displays 20 plots arranged in a 10x2 grid, showing the evolution of the number of nodes (N) and edges (E) in a network over time (t) for different values of the parameter α . The rows correspond to α values from 0.1 to 1.0, and the columns correspond to N and E respectively. The x-axis represents time (t) from 0 to 100, and the y-axis represents the number of nodes (N) or edges (E) from 0 to 100. The plots show that as α increases, the network structure evolves differently, with higher α values leading to a more stable network structure.
